

Installation Solutions for Every Job

SpeedRod™ hangers are created to provide the Contractor increased production with minimal effort that consistently maintains the full R-Value of the insulation satisfying both client and architect.

The unique design of **SpeedRod's™ "H1 Batt Hangers"** helps to create a support shelf that holds insulation snugly against the air barrier without excessive compression.

Whether used for residential or commercial use, proper installations are critical to any project. We have designed this product with you in mind with benefits that include:

- *A custom fit to meet any job with bendable / adjustable hangers*
- *Makes Installation of BATT insulation quicker and efficient – cutting time in most cases in half*
- *Minimal training needed*
- *Reduced callbacks*
- *One product for truss systems from 16" to 24" inches wide on center & different insulation depths 6" to 15" inches deep*
- *Makes retrofits and insulating crawlspaces easier and more efficient*
- *Durable high tensile strength rust free wire*

P.O. Box 12549
Tucson, AZ 85732
800.957.7279
